

## Research Professor Position in Ocular Health

Independent research program with focus on ocular health and vision sciences, or related fields (gene editing, tissue engineering, omics techniques...), complementary to the existing research programs in the Regenerative Medicine Division of the *Research Center of CHU de Québec-Université Laval* and Université Laval, Québec, Canada.

Axe Médecine  
Régénératrice

Applications are open for the position of research professor starting in July 2025.

### The candidate should have:

- a PhD in a relevant discipline (e.g., chemistry, biophysics, molecular/cellular biology, biochemistry, physiology, medicine);
- at least 3 years of experience as a postdoctoral fellow or equivalent;
- demonstrated creativity and scientific productivity;
- basic language skills in French or willingness to learn French and to become fluent.

The successful candidate will be expected to teach (on a sporadic basis) at the oldest and largest French-speaking university in North America.

The desire and the ability to integrate into a collaborative environment and to subscribe to our values of equity, diversity and inclusion are important aspects of the profile sought.

The successful candidate will find a congenial and highly productive and stimulating research environment, with access to significant resources and core facilities, and ample opportunity for the development of interdisciplinarity in basic and clinical research. An independent research program in one of the fields of ocular health is a must.

The candidate is expected to submit an application for a Quebec research scholarship (FRQS Junior 1 or 2) in the first year. The [Regenerative Medicine Division](#) of the [Research Center of CHU de Québec – Université Laval](#) has 28 university scientists, 53 clinicians, and over 100 students and 60 employees working on various research projects of the 3 main research themes - Ocular Health; - Biomaterials and Biomedical Materials; - Tissue Engineering and Stem Cells.

[Université Laval](#) is a large institution (45,000 students, 1,600 professors in 17 faculties) with a human dimension, located on a green and wooded campus in the heart of beautiful Québec City. By becoming a professor at Université Laval, you will join a community that is committed to offering a unique student experience and to fostering a bold and open scientific culture, rooted in global challenges and resolutely interdisciplinary. The employment conditions at Université Laval are attractive: a very competitive salary and a comprehensive and competitive range of social benefits. In addition, Université Laval offers a work environment that promotes your well-being with an inclusive culture where everyone can flourish.

**The application must include:** 1) cover letter; 2) curriculum vitae; and 3) summary of the applicant's scientific background and accomplishments (1 page).

Application packages should be sent to [stephanie.proulx@fmed.ulaval.ca](mailto:stephanie.proulx@fmed.ulaval.ca) before August 1st, 2024.

The selection committee will invite the most competitive applicants to give a seminar (virtual) and discuss his/her proposed research program with members of the division, and will subsequently invite them to enter the CRCHU de Québec and Université Laval tenure track selection process.
